

SCC has been selected as a launch partner for Microsoft Surface Hub

SCC has been selected as a launch partner for Microsoft Surface Hub – a large format display, either 55” or 84”, powered by Windows 10 with touch capability and two cameras built in for Skype for Business video conferencing.

Essentially, it will turn a meeting room into a Skype for Business collaboration room and it is also perfect for team and huddle spaces with its simple and easy to use interface.

Engaging and productive meetings

Microsoft Surface Hub reimagines the meeting experience so that you can unlock the power of the group. You can walk up and join a Skype for Business meeting with a single tap, and share content effortlessly, so that you spend your time connecting to people rather than technology. And since you can easily send meeting notes and content, you can communicate outcomes and action points.

Scheduled or spontaneous

Schedule meetings in advance with Skype for Business or invite remote attendees ad hoc when you want to bring them into the discussion.

One-touch meeting start

Start meetings on time with a tap of the screen. End your session with an option to save and send meeting content to the group for later use.

Easy to share content

You can easily share content from laptops, tablets, or phones. With inkback™ and touch-back™, your changes will appear on compatible personal devices.

Engaging for everyone

Everyone can see content and contribute equally no matter where they are. Clear sound and high-quality video make meetings great.

Best way to create and brainstorm with others

Make working together the most productive part of your day. Share your ideas with others on a canvas that is as big as your imagination. Bring teams together in a way that feels completely natural, with technology that doesn't intrude, but helps ideas flow. Expand what can be accomplished in the moment and then don't lose the momentum – capture your work so you can act on it later.

OneNote whiteboard

Use the OneNote whiteboard to share ideas on an infinite canvas, paste and annotate content from other apps, and bring remote participants into the brainstorm.

Fluid, natural ink

The ink on Microsoft Surface Hub is so fluid and responsive that it feels just like a pen – and it lets two people ink at the same time.

Built for teamwork

Whether you're in the room or on the other side of the world, Microsoft Surface Hub brings everyone into the collaboration.

Take your ideas with you

Save your whiteboard as a rich OneNote file and email it to others so your ideas don't evaporate when the meeting ends.

Platform for amazing large screen apps

In addition to the built-in team experiences like Skype for Business, Microsoft Office and OneNote, Microsoft Surface Hub is customisable with a wide array of applications. Universal apps built for Windows 10 shine on Microsoft Surface Hub and scale to the large screen. You can also connect apps from your personal device and drive them from Microsoft Surface Hub.

Windows apps

You can run universal Windows apps natively from Microsoft Surface Hub or connect applications from your personal device.

Familiar apps

Microsoft Surface Hub includes familiar Microsoft software and services that your business relies on, like Skype for Business, Office and OneNote.

Create your own app

Build amazing experiences, designed specifically for your business, on the Microsoft Surface Hub platform.

Integrated solution

Microsoft Surface Hub apps take advantage of the large screen, touch and ink input, and onboard hardware like cameras and sensors.

Advanced technology for the modern workplace

Microsoft Surface Hub integrates beautifully into the modern workplace, enabling productivity in any space where people come together to get things done, from large conference rooms to informal huddle spaces to offices. The fully integrated design, choice of two screen sizes, and flexible mounting configurations means there's a solution for your business needs. Microsoft Surface Hub is also designed to be easy to deploy and manage remotely.

Any space

The fully integrated design, flexible mounting options and stands, plus a choice of two sizes means there is a solution for any space.

Every user

Walk up to Microsoft Surface Hub and start working immediately. The simple, intuitive interface makes the experience natural and inviting.

Connected

Microsoft Surface Hub offers a variety of inputs including wireless projection, HDMI, NFC, Bluetooth, and ports to connect to peripheral devices.

Scale with your enterprise

Microsoft Surface Hub was designed to be centrally managed and updated, enabling you to deploy at scale.

Hub Specifications

Display:

- 55" HD
- 84" 4K

Processor:

- 4th generation Intel® Core™ processor family

Sensors:

- Infrared, imaging and depth sensors

Graphics:

- 55": Intel® HD Graphics 4600
- 84": NVIDIA Quadro K2200

Cameras:

- 2 built-in wide-angle HD cameras

Key Features

Ink

A responsive and natural inking experience that feels as fluid as a pen on paper.

Touch

Advanced touch capabilities recognise up to 100 touch points with precision, allowing multiple people to interact with the screen simultaneously.

Windows 10

A new experience for Windows 10 that is tailored for group use, with ink and touch at its core. Many applications can be used without authentication.

Ships with Office

Microsoft Surface Hub comes with Microsoft Office apps like Word, Excel and PowerPoint, plus the OneNote whiteboard and Skype for Business.

Why SCC

Surface Hub is in a unique category as it is an Audio Visual (AV) product with Microsoft productivity software, which can integrate into an Enterprises IT infrastructure to get maximum value from the investment.

SCC have both an established AV business with specialists that can advise you on how best to meet your AV requirements, detailed configuration information as well as the logistics of implementing a Surface Hub solution. Also, SCC is one of Microsoft's leading services partners with a relationship established over 30 years ago.

Our professional services practice has over 100 Microsoft Certified Professionals which means we can help bring the full functionality of the Surface Hub to life by designing and integrating the solution into your existing Microsoft environment. We believe we are unique in being able to offer this end to end capability from one company.
